

Restoration and Revegetation Partial Project List

Suding Design has a diverse portfolio of project types, making us flexible and knowledgeable in many areas. The following is a partial list of Restoration and Revegetation projects:

University of California at Santa Barbara

East Bluff Maintenance and Renovation - Multi-phase ocean bluff-top native plant restoration and trail plan for a popular campus open space.
Seawater Facilities Replacement Project - Ocean Bluff Revegetation Plans

City of Santa Barbara

Parks Department - Flood damage Restoration Plans
Laguna Channel - Restoration Plan
El Estero Drainage Wetland Restoration - Revegetation Plans for Western Pond Turtle habitat with an interpretive trail.

County of Santa Barbara

Castilian Creek - Riparian Revegetation & Wild-life Enhancement Plans / Monitoring

Westmont College

Las Barrancas Faculty Housing - Erosion Control, Creek Revegetation and Firescape Landscape Plans

Saint Vincent's School

Administration Building Demolition - Revegetation Plans

Phillip's Petroleum Abandonment

Tajiguas Facility - Revegetation Plans

The Towbes Group

Willow Springs - Revegetation Plans for a wetland slope. The project included a transition landscape of mostly native plants between a high density residential development and wetland.
The Bluffs at Mesa Oaks - Restoration and Mitigation Plans for a planned community development in a rare chaparral habitat. The plans include community trails. In collaboration with LFR.
